Hello,

Please see below for information regarding the construction of a multi-use path in the Robert-Stewart corridor, between Jockey Street and Denise-Pelletier Street.

Construction Period

- Start: August 31, 2026, with no access restrictions planned for the first day of school
- Expected completion: October 16, 2026 – subject to change

Description of the Work

The work will include:

- Rehabilitation and resurfacing of the former Robert-Stewart Road;
- Construction of a 4-metre-wide paved cycling and multi-use path;
- Landscaping and grassing of the adjacent rights-of-way;
- Improvements to connections with existing infrastructure, including the cycling path on de l'Hippodrome Avenue and nearby pedestrian crossings;
- Creation of new multi-use connections linking Howard Street, Félix-Leclerc Street and Denise-Pelletier Street to the Robert-Stewart corridor;
- Installation of the required access-control devices for emergency connections.

Expected Impacts

During the construction period, users can expect:

- Limited access to des Cavaliers School;
- Phased closures of the Robert-Stewart Trail;
- Temporary detours;
- Flaggers when required;
- Occasional restrictions to pedestrian and cyclist traffic.

Users are asked to follow all posted signage and plan their trips accordingly.

Access to des Cavaliers School

A traffic management plan has been established for access to des Cavaliers School:

- Buses coming from the west will be able to access the school via the unnamed street from Aylmer Road and will have to continue eastbound to leave the neighbourhood;
- Parents must enter from the east side of Nancy-Elliott Street for student drop-off and exit to the west via the unnamed street;
 - The U-turn prohibition will remain in effect, and compliance will be essential for the safety of children;
 - The No Parking/Stopping zone north of the street will temporarily be replaced by 15-minute limited parking to allow parents to park in front of the school.

The school has been notified and will provide parents with further information.

Thank you for your understanding and cooperation during this active transportation infrastructure improvement project.

I remain available should you have any questions.
